Re-thinking Lifescape  
Linking Landscape to Everyday Life

We experience ordinary places and environments every day. Lifescape, landscape in everyday life, is a precondition for existence as well as a background for living. We, however, seldom notice its values because of the veil of familiarity. By rethinking lifescape, we can evoke values not typically associated with cultural landscapes and heritages.

### Call for papers

#### Main Theme

*Re-thinking Lifescape: Linking Landscape to Everyday Life*

To propose a paper for one of the four sub-themes, please submit a concise one page abstract (max. 300 words including 3-5 keywords), in English, by email.

---

#### Theme 1 New Ideas and Theories of Cultural Landscape
